**Subject:** FW: Draft agenda suggestions for SC RECLAIM

Hi Michael and Susan,

We wanted to share with you some major topics that we want to make sure we discuss during our face to face meeting. Based on our latest discussions, we've come up with this list.

Also, after introductions and such, we thought it would be useful to start the meeting by doing a short chronology of the RECLAIM program approval and the changes in our regulations that we must consider now as we move forward with the approval.

I was not sure how you wanted to shape the agenda, so here is what we thought we could do.

I think it would also be useful to put timeframes around the various topics to make sure that we give time to the other times.

Let me know what you think.

Gerardo

- Start meeting with past action on how the program was approved
  - o EPA – Chronology
    - Circumstances have changed since then (e.g. NSR reform).
- NSR:
  - o Actual to potential test and options for satisfying the NSR requirements.
- 110(I)
  - o The 110(I) demonstration will need to be made as an overarching program requirement
    - SIP Revision: Timing and process for submitting for submitting rules to EPA as you dismantle RECLAIM.
    - When/which plan will be in place when all the rules (e.g. RACT and NSR) are submitted. Are they going to be submitted all at once or in pieces?
  - o 110(I) for NSR – what is also needed specifically for NSR.
- RACT (some of the items below may be covered during the 110(I) discussion)
  - o RACT rules' reliance on permits
  - o 2015 O3 NAAQS RACT SIP deadline is in 8/2020, will that submittal rely on the revised landing rules and associated staff reports and not contain a discussion about RACT in the aggregate / RECLAIM?
  - o Demonstration that all former RECLAIM sources are now subject to RACT limits
